

PORTOLA TECH
INTERNATIONAL

Why settle for one or two colors?

MAKE A STATEMENT with Thermally Applied Graphics

- More aesthetically appealing than a label
- Excellent image quality
- Designs can have up to 14 colors
- 4-color process printing possible
- Can duplicate the metallic look of foil hot stamp
- Less expensive than multi-pass silk screen or hot stamp
- One-pass application eliminates registration mistakes
- Superior abrasion and chemical resistance

THE PROCESS:

Your artwork is pre-printed onto a film carrier. The roll of film then attaches to Portola Tech's application machine, which uses heat and pressure to transfer the ink to your jar or closure in a single pass.

Call (800) 556-7630 or email info@portolatech.com for quotes and samples.
